Index to Volume 58

The Journal of Heredity, 1967

Abbott, Ursula K. and F. H. Lantz, Second occurrence of Donald Duck beak in chickens, 240.
Abrachiate, an androecious mutant muskmelon, R. E. Foster and W. T. Bond, 13.
Additions to the lists of chromosome numbers in the insectivores and primates, D. S. Borgaonkar, 211.
Ahuja, M. R. and G. L. Hagen, Cytogenetics of tumor-bearing interspecific triploid *Nicotiana glauca-langsdorffii* and its hybrid derivatives, 103.
AIBS emeritus biologists program, 224.
Albino axolotls from an albino tiger salamander through hybridization, R. R. Humphrey, 95.
Ametapodia, a dominant mutation in the fowl, R. K. Cole, 141.

Animal Genetics:

Animal genetics (rev.), 203.
Axolotls: albino from an albino tiger salamander through hybridization, 95; color variant in Mexican, 251.
Blowfly: autosomal recessive yellow-eyed mutation, 87.
Boll weevil: genetic markers, 159.
Cat: gene frequencies in Paris population, 89.
Cattle: achondroplasia: possible reconstitution of the Telemark lethal, 220; probable hereditary skeletal deformity in Hereford, 311.
Cockroach: new mutants and linkage tests in the German, 274.
Dog: computer calculation of Wright's inbreeding coefficient, 81.
Drosophila melanogaster: genetic control of pigment accumulation and its bearing on the adult life span, 47; effect of genotype, mating status, weight and egg production on longevity, 169; pentose phosphate pathway enzyme studies of the *lz* allele, 243.
Drosophila pseudoobscura: new gene arrangement in the third chromosome, 3; gene arrangements in the third chromosome; all possible configurations, 113.
Fowl: encyclopedia of pigeon breeds (rev.), 6; prenatal, a sex-linked lethal mutation, 25; crooked neck dwarfs in Japanese quail, 44; gene for partial feather achromatosis, 131; ametapodia, dominant mutation, 141; "porcupine" chickens, 163; hereditary muscular dystrophy in domestic turkeys, 189; microscopic study of uterine eggshell pigment in Japanese quail, 200; second occurrence of Donald Duck beak in chickens, 240.
Fox: chromosome elimination in evolution of silver, 75.
Goat: Y chromosome, 261.
Hamsters: karyotype of the Kurdistan, 29; problem of histocompatibility in wild, 40; coat color mutations in Syrian, 295.
Honey bee: drones with jet black bodies, 184.
Insectivores: additions to lists of chromosome numbers, 211.
Mice: phenylalanine metabolism in a dilute-lethal strain, 14; biology of the laboratory mouse (rev.), 16; pale ear and light ear mimic mutations in linkage groups XII and XVII, 17; linkage groups III and XVII and the position of the light-ear locus, 21; shambling, a neurological mutant, 65; rotating, a new gene affecting behavior and the inner ear, 69; hydrocephalus in western harvest, 101; audiogenic seizures in eleven strains, 135; linkage of Es-1 and Es-2, 186; skin and hair of tabby, 197; linkage group II, 225; sex ratio as possible indicator of mutation rate for sex-linked lethals, 285; giant granules in leukocytes of beige, 299.
Moth: mutant traits of larval and pupal stadia of wax, 179.
Primates: additions to lists of chromosome numbers, 211.
Rabbits: droopy-ear, 149; a model for study of development, pathology and inheritance of malocclusion, 245.
Raccoon: chromosomes, 172.
Rat: reduced viability among progeny of irradiated male, 37.
Sheep: Quantitative disparity between hemoglobins, 279.

Arisumi, Toru, A dominant gene for anthocyanin in the leaf-blades of African violets, 259.
Association of linkage group V with chromosome 2 in *Neurospora crassa,* R. L. Phillips, 263.
Audiogenic seizures in eleven mouse strains, John L. Fuller and Frank H. Sjursen, Jr., 135.
Autosomal recessive yellow-eyed mutation in the blowfly, Peter C. Chabora, 87.

Bacus, James W., *et al.,* Computer calculation of Wright's inbreeding coefficient, 81.
Bagnara, Joseph T. and R. R. Humphrey, A color variant in the Mexican axolotl, 251.
Balls, L. D., *et al.,* Probable hereditary skeletal deformity in Hereford cattle, 311.
Barnett, Don R., *et al.,* Pentose phosphate pathway enzyme studies of the *lz* allele of *Drosophila melanogaster,* 243.
Bartlett, Alan C., Genetic markers in the boll weevil, 159.
Basrur, P. K. and D. R. Stoltz, The Y chromosome of the goat, 261.
Bemis, W. P. and David Groff, Meiotic irregularities in *Cucurbita* species hybrids, 109.
Bernard, R. L., Inheritance of pod color in soybeans, 165.
Bernier, Paul E., Heredity in animals and its management, (rev.), 203.
Billingham, R. E., *et al.,* The problem of histocompatibility in wild hamsters, 40.
Binns, Wayne, *et al.,* Probable hereditary skeletal deformity in Hereford cattle, 311.
Biology of the laboratory mouse, (rev.), W. E. Heston, 16.
Bock, Margaret and Irwin M. Greenblatt, A commercially desirable procedure for detection of monoploids in maize, 9.
Bond, W. T. and R. E. Foster, Abrachiate, an androecious mutant muskmelon, 13.
